FATWA APPROVAL FOR THE TIPBOT TROY GOLD TOKEN (THE “PRODUCT”)

We, the Amanie Shariah Supervisory Board (“SSB”) have been presented with the Whitepaper and Terms of Service for the Product.

The Product uses blockchain technology to provide an alternative method to raise funds in order to aid the transition of Bullseye Mining Ltd, from a gold exploration company to a fully-fledged gold mining company.

Tipbot issues their cryptocurrency known as GOLD tokens to investors (holders) for cash. The tokens holders are offered an option to purchase gold products at a future date in exchange for tokens.

In addition, Tipbot has developed the Troy Vault that enables secure transactions with Tipbot’s GOLD tokens, Ethereum and other tokens. The TROY Vault will secure access to all ERC-20 & ERC-223 tokens in the digital asset wallet. The GOLD tokens will be issued on the Ethereum platform.

Gold mined by Bullseye Mining Ltd (Australia) (Bullseye) will be used to create the gold products. Tipbot has a Pre-Payment Agreement with Bullseye in which it must deliver a certain quantity of physical gold to the custodian, Perth Mint, who will hold it securely on behalf of Tipbot. Funds raised from the token sale will be used to develop services related to the Troy Vault as well as support further gold pre-purchase contracts.

During a purchase period, Tipbot will release a range of gold products which can be purchased using the GOLD tokens. These may include, but are not limited to:

- o Gold Bars
- o Gold Jewellery
- o Gold Medallions
- o Personalised Gold items designed by specialists

For each sale of gold product there will be a sale transaction recorded on the blockchain whereby the token holder’s total number of GOLD tokens will get debited and Troy’s balance of GOLD tokens will get credited. The sale will include a storage and/or shipment cost from the Perth Mint to the buyer.

Once the sale transaction is confirmed, Tipbot will inform the Perth Mint (custodian) to allocate the correct number of physical gold ounces (or part thereof) to the buyer, and, instruct the Perth Mint as to the storage/shipment requests of the buyer. Tipbot will then provide sale/storage/shipment confirmation to the buyer.

If the token holder would like to exchange for cash instead of gold, they may do so into USD at the price of the spot gold at the time of exchange.

Pursuant to the review of the above, we, the SSB, hereby give approval that the Product complies with the necessary Shariah compliance requirements. This Fatwa is issued in accordance with the latest information and terms and conditions contained in the Terms of Service and Whitepaper (last updated 2 October 2019) ('Documents') and such approval will be reviewed from time to time in the event of any changes made in the Documents.

Allah Almighty knows best.
